3 Courses

Deep Learning - Artificial Neural Networks with TensorFlow

Deep Learning - Recurrent Neural Networks with TensorFlow

Deep Learning: Convolutional Neural Networks with TensorFlow

Mar 29, 2026

Chinmay Kale

has successfully completed the online Specialization

Deep Learning with TensorFlow

Congratulations on completing the "Deep Learning with TensorFlow" specialization! This certificate reflects your ability to work with deep learning architectures and tools such as TensorFlow and Keras. You have gained expertise in building and optimizing neural networks, including artificial neural networks (ANNs), recurrent neural networks (RNNs), and convolutional neural networks (CNNs). Through hands-on experience with real-world datasets and deep learning techniques, you now possess the skills to apply these methods to various applications, including image classification, time series forecasting, and natural language processing.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
